

Scientific Journals Impact Factor Ranking

Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis **The Impact of Higher Education Ranking Systems on Universities** **World University Rankings and the Future of Higher Education** **Multidimensional Journal Evaluation** *Journals of the Century* **Exact Methods in the Study of Language and Text** **Ranking** Annual Review of Cell and Developmental Biology **Sofia Journal Evaluation of the Arkansas Tobacco Settlement Program** **Urban Development in Asia and Africa** *Measuring Up in Higher Education* *International Encyclopedia of Human Geography Handbook* **Bibliometrics** **Confronting Dogmatism in Gifted Education** The Future of the Academic Journal *Advances in Distributed Computing and Machine Learning* *Vital Statistics on Congress, 1991-1992* **Educational Rankings Annual 2005** **Prometheus Assessed?** Nonparametric Statistical Methods Using R **2016 Management and Innovation Technology International Conference (MITicon)** *Measuring Academic Research* Toward Quality Assurance and Excellence in Higher Education **Scholarly Communication in Library and Information Services** **Educational Rankings Annual 2006** *Research and Advanced Technology for Digital Libraries* Annual Review of Information Science and Technology 2007 *University Rankings* Publish or Perish How to Complete a PhD *Supply chain management theory and practice - the emergence of an academic discipline?* Evaluation of the Arkansas Tobacco Settlement Program **Critical Essays in Sport Management** **Advanced Quantitative Research Methods for Urban Planners** Society and Technology Intelligent Information and Database Systems *Computer Security Handbook* **Open Government: Concepts, Methodologies, Tools, and Applications**

This is likewise one of the factors by obtaining the soft documents of this **Scientific Journals Impact Factor Ranking** by online. You might not require more time to spend to go to the book introduction as capably as search for them. In some cases, you likewise accomplish not discover the declaration Scientific Journals Impact Factor Ranking that you are looking for. It will utterly squander the time.

However below, when you visit this web page, it will be correspondingly very simple to get as with ease as download lead Scientific Journals Impact Factor Ranking

It will not believe many times as we notify before. You can do it though law something else at home and even in your workplace. correspondingly easy! So, are you question? Just exercise just what we come up with the money for under as skillfully as evaluation **Scientific Journals Impact Factor Ranking** what you as soon as to read!

Annual Review of Cell and Developmental Biology Feb 25 2022

2016 Management and Innovation Technology International Conference (MITicon) Dec 14 2020 1 Information Technology, Engineering, and Management 2 Logistic and Supply Chain 3 Social Sciences 4 Forensics Science and Innovation Technology 5 Strategic Technology and Management 6 Sustainable Technology

Nonparametric Statistical Methods Using R Jan 15 2021 Nonparametric Statistical Methods Using R covers customary nonparametric methods and rank-based examinations, including estimation and deduction for models running from straightforward area models to general direct and nonlinear models for uncorrelated and corresponded reactions. The creators underscore applications and measurable calculation. They represent the methods with numerous genuine and mimicked information cases utilizing R, including the bundles Rfit and npsm. The book initially gives a diagram of the R dialect and essential factual ideas previously examining nonparametrics. It presents rank-based methods for one-and two-example issues, strategies for relapse models, calculation for general settled impacts ANOVA and ANCOVA models, and time-to-occasion examinations. The last two parts cover further developed material, including high breakdown fits for general relapse models and rank-based surmising for bunch associated information. The book can be utilized as an essential content or supplement in a course on connected nonparametric or hearty strategies and as a source of perspective for scientists who need to execute nonparametric and rank-based methods by and by. Through various illustrations, it demonstrates to perusers proper methodologies to apply these methods utilizing R.

Ranking Apr 29 2022 Human beings are competitive. We want to know who is the strongest, who is the richest, and who is the cleverest of all. Some situations, like ranking people based on height, can be ranked in objective ways. However, many "Top Ten" lists are based on subjective categorization and give only the illusion of objectivity. In fact, we don't always want to be seen objectively since we don't mind having a better image or rank than deserved. **Ranking: The Unwritten Rules of the Social Game We All Play** applies scientific theories to

everyday experience by raising and answering questions like: Are college ranking lists objective? How do we rank and rate countries based on their fragility, level of corruption, or even happiness? How do we find the most relevant web pages? How are employees ranked? This book is for people who have a neighbor with a fancier car; employees, who are being ranked by their supervisors; managers, who are involved in ranking but may have qualms about the process; businesspeople interested in creating better visibility for their companies; scientists, writers, artists, and other competitors who would like to see themselves at the top of a success list; or college students who are just preparing to enter a new phase of social competition. Readers will engage in an intellectual adventure to better understand the difficulties of navigating between objectivity and subjectivity and to better identify and modify their place in real and virtual communities by combining human and computational intelligence.

Annual Review of Information Science and Technology 2007 Jun 07 2020 ARIST, published annually since 1966, is a landmark publication within the information science community. It surveys the landscape of information science and technology, providing an analytical, authoritative, and accessible overview of recent trends and significant developments. The range of topics varies considerably, reflecting the dynamism of the discipline and the diversity of theoretical and applied perspectives. While ARIST continues to cover key topics associated with classical information science (e.g., bibliometrics, information retrieval), editor Blaise Cronin is selectively expanding its footprint in an effort to connect information science more tightly with cognate academic and professional communities.

Handbook Bibliometrics Aug 22 2021 Bibliometrics and altmetrics are increasingly becoming the focus of interest in the context of research evaluation. The Handbook Bibliometrics provides a comprehensive introduction to quantifying scientific output in addition to a historical derivation, individual indicators, institutions, application perspectives and data bases. Furthermore, application scenarios, training and qualification on bibliometrics and their implications are considered.

Ranking Mar 29 2022 Human beings are competitive. We want to know who is the strongest, who is the richest, and who is the cleverest of all. Some situations, like ranking people based on height, can be ranked in objective ways. However, many "Top Ten" lists are based on subjective categorization and give only the illusion of objectivity. In fact, we don't always want to be seen objectively since we don't mind having a better image or rank than deserved. *Ranking: The Unwritten Rules of the Social Game We All Play* applies scientific theories to everyday experience by raising and answering questions like: Are college ranking lists objective? How do we rank and rate countries based on their fragility, level of corruption, or even happiness? How do we find the most relevant web pages? How are employees ranked? This book is for people who have a neighbor with a fancier car; employees, who are being ranked by their supervisors; managers, who are involved in ranking but may have qualms about the process; businesspeople interested in creating better visibility for their companies; scientists, writers, artists, and other competitors who would like to see themselves at the top of a success list; or college students who are just preparing to enter a new phase of social competition. Readers will engage in an intellectual adventure to better understand the difficulties of navigating between objectivity and subjectivity and to better identify and modify their place in real and virtual communities by combining human and computational intelligence.

Sofia Journal Jan 27 2022 Beautiful monarch-inspired personalized journal with the girl's name "Sofía." Cover art is original photography of a monarch pollinating yellow field flowers. The journal is 6 x 9 and has 200 lined pages.

Confronting Dogmatism in Gifted Education Jul 21 2021 "Concepts and definitions in the field of gifted education have been unsettled and contested for many years, and interest in clarifying notions of high ability has been growing. While discussions and arguments are ongoing, most of them don't go deep enough or range broadly enough to reveal the dogmatism that limits the perspectives of professionals, policymakers, and other stakeholders in gifted education. This book looks beyond the predominant conceptual frameworks that dominate thinking about giftedness and talent. Leading thinkers in the field of gifted education question fundamental assumptions about high ability and probe the larger contexts that influence gifted education. The first section of the book includes explorations of big-picture issues pertaining to fundamental assumptions about giftedness and talent. The second section addresses ways in which economic and academic contexts in today's globalized world can affect otherwise gifted minds. Section three explores the effects of these contextual influences on curriculum and instruction in the education of the highly able. Finally, a synthesis chapter analyzes patterns in the other contributions and makes recommendations for refinement of gifted education"-- Provided by publisher.

Measuring Academic Research Nov 12 2020 Measuring Academic Research outlines how to undertake a bibliometric study, a topic of vital importance in academic research today. Scientometrics studies assess scientific productivity and can be applied to all disciplines. Many analyses have been applied in relation to bibliometric studies, but few have shown how to actually carry out the analysis. This book provides a guide on how to develop a bibliometric study, from the first step in which the topic study has to be set, to the analysis and interpretation. A practical and easy to read guide on how to carry out a bibliometric study Gives a wide and up-to-date view about the most common scientometric indexes Analyses are illustrated with multiple and practical examples about their application

Exact Methods in the Study of Language and Text May 31 2022 The collection contains more than 60 original papers and reflects current research topics in linguistics and text analysis. Most of the papers present recent results of empirical quantitative investigations; others focus on methodological issues, whereas some of them are of a more theoretical, systems-theoretical/semiotic character. Finally, a number of contributions form typical integrative deductive-inductive studies. The volume is a valuable source of information about the current state-of-the-art in quantitative linguistic research, presented by renowned representatives of the field.

Supply chain management theory and practice - the emergence of an academic discipline? Feb 02 2020 This e-book asks: Is Supply Chain Management an emerging academic discipline? Supply Chain Management (SCM) has continued to grow in prominence within the field of Operations Management and also within the broader discipline of management. Practitioners have begun to adopt and adapt new techniques to supply management that improve firm performance. Organizations in both the public and private sectors are becoming increasingly aware of the pivotal role that SCM can play in their business success. This is a challenging special issue aimed at stimulating debate rather than providing a definiti.

Research and Advanced Technology for Digital Libraries Jul 09 2020 This book constitutes the refereed proceedings of the International Conference on Theory and Practice of Digital Libraries, TPDL 2013 (formerly European Conference on Research and Advanced Technology for Digital Libraries, ECDL) held in Valletta, Malta, in September 2013. The 24 full papers, 13 short papers, 22 posters and 8 demonstrations presented in this volume were carefully reviewed and selected from 158 submissions. The papers cover a wide range of research topics, clustered in four broader areas: foundation, infrastructures, content, and services. They have been organized in topical sections on conceptual models and formal issues, aggregation and archiving, user behavior, digital curation, mining and extraction, architectures and interoperability, interfaces to digital libraries, semantic web, information retrieval and browsing, and preservation. Also included are 6 tutorials and 2 panels.

Open Government: Concepts, Methodologies, Tools, and Applications Jun 27 2019 Open government initiatives have become a defining goal for public administrators around the world. As technology and social media tools become more integrated into society, they provide important frameworks for online government and community collaboration. However, progress is still necessary to create a method of evaluation for online governing systems for effective political management worldwide. *Open Government: Concepts, Methodologies, Tools, and Applications* is a vital reference source that explores the use of open government initiatives and systems in the executive, legislative, and judiciary sectors. It also examines the use of technology in creating a more affordable, participatory, and transparent public-sector management models for greater citizen and community involvement in public affairs. Highlighting a range of topics such as data transparency, collaborative governance, and bureaucratic secrecy, this multi-volume book is ideally designed for government officials, leaders, practitioners, policymakers, researchers, and academicians seeking current research on open government initiatives.

Intelligent Information and Database Systems Aug 29 2019 The two-volume set LNAI 8397 and LNAI 8398 constitutes the refereed proceedings of the 6th Asian Conference on Intelligent Information and Database Systems, ACIIDS 2014, held in Bangkok, Thailand, in April 2014. The 125 revised papers presented were carefully reviewed and selected from 300 submissions. The papers address the following topics: natural language and text processing, intelligent information retrieval, semantic Web, social networks and recommendation systems, intelligent database systems, decision support systems, computer vision techniques, and machine learning and data mining. The papers are organized in topical sections on multiple model approach to machine learning, MMAML 2014, computational intelligence, CI 2014, engineering knowledge and semantic systems, IWEKSS 2014, innovations in intelligent computation and applications, IICA 2014, modeling and optimization techniques in information systems, database systems and industrial systems, MOT 2014, innovation via collective intelligences and globalization in business management, ICIGBM 2014, intelligent supply chains, ISC 2014, and human motion: acquisition, processing, analysis, synthesis and visualization for massive datasets, HMMD 2014.

How to Complete a PhD Mar 05 2020

Educational Rankings Annual 2005 Mar 17 2021 This up-to-date resource presents more than 4,000 national, regional, local and international lists and rankings compiled from hundreds of respected sources. Entries typically include a description of the ranking; background information on criteria for establishing the hierarchy; additional remarks about the ranking; the complete or partial (if extensive) ranking; and a complete source citation for locating additional information if necessary.

Advanced Quantitative Research Methods for Urban Planners Oct 31 2019 *Advanced Quantitative Research Methods for Urban Planners* provides fundamental knowledge and hands-on techniques about research, such as research topics and key journals in the planning field, advice for technical writing, and advanced quantitative methodologies. This book aims to provide the reader with a comprehensive and detailed understanding of advanced quantitative methods and to provide guidance on technical writing. Complex material is presented in the simplest and clearest way possible using real-world planning examples and making the theoretical content of each chapter as tangible as possible. Hands-on techniques for a variety of quantitative research studies are covered to provide graduate students, university faculty, and professional researchers with useful guidance and references. A companion to *Basic Quantitative Research Methods for Urban Planners*, *Advanced Quantitative Research Methods for Urban Planners* is an ideal read for researchers who want to branch out methodologically and for practicing planners who need to conduct advanced analyses with planning data.

University Rankings May 07 2020 This ground-breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases, methodological issues, societal impact, and policy implications, providing readers with a deep understanding of these controversial comparators. The authors propose that university rankings are misused by policymakers and institutional leaders alike. They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys' assessment of their status. The result is that institutions suffer from short-termism, realigning their resources to maximize their relative rankings. While rankings are widely used in policy and academic discussions, this is the first book to explore the theoretical and methodological issues of ranking itself. It is a welcome contribution to an often highly charged debate. Far from showing how to manipulate the system, this collection of work by key researchers aims to enlighten interested parties.

Critical Essays in Sport Management Dec 02 2019 This collection of essays, written by a number of respected sport management scholars, addresses many of the challenges and issues facing today's sport management academic programs. It is intended to begin a professional and scholarly discussion to identify the best, or at least the most logical, paths to follow for sport management programs and the industry with which they are so closely aligned. Contributors, invited to participate based on their recognized areas of expertise, address specific topics using their own unique voices and writing styles. In the ebook version, essays link to video introductions by the authors and to online discussion forums where readers can respond to the issues presented in the essays. From the Preface: The field of sport management stands at an academic crossroads; the essays in this book address the following and other emerging questions: Should our successful field of study continue to model other disciplines and perpetuate their successes, as well as their shortcomings, or should we determine our own specific model for academic success? How are we doing in preparing future sport managers to perform in the industry and on the global stage? Where do we belong in the scheme of academe? The book's goal is to generate discussion among sport management professors, industry professionals who serve as adjunct faculty and participate on sport management program advisory boards, doctoral students who intend to teach in sport management programs, and others who explore and critique higher education in general.

Urban Development in Asia and Africa Nov 24 2021 This book examines the urban growth trends and patterns of various rapidly growing metropolitan regions in developing Asian and African nations from the perspective of geography. State-of-the-art geospatial tools and techniques, including geographic information system/science and remote sensing, were used to facilitate the analysis. In addition to the empirical results, the methodological approaches employed and discussed in this book showcase the potential of geospatial analysis, e.g. land-change modeling for improving our understanding of the trends and patterns of urban growth in Asia and Africa. Furthermore, given the complexity of the urban growth process across the world, issues raised in this book will contribute to the improvement of future geospatial analysis of urban growth in the developing regions. This book is written for researchers, academicians, practitioners, and graduate students. The inclusion of the origin and brief history of each of the selected metropolitan regions, including the analysis of their urban primacy, spatiotemporal patterns of urban land-use changes, driving forces of urban development, and implications for future sustainable development, makes the book an important reference for various related studies.

Educational Rankings Annual 2006 Aug 10 2020 Presents more than 4400 national, regional, local and international lists and rankings compiled from hundreds of respected sources.

Publish or Perish Apr 05 2020 Imad Moosa's thought-provoking book explores the contemporary doctrine that plagues the academic sphere: the principle of publish or perish. This book identifies the pressures placed upon academics to either publish their work regularly, or suffer the consequences, including lack of promotion, or even redundancy.

Journals of the Century Jul 01 2022 This book, first published in 2002, gathers some of America's top subject expert librarians to determine the most influential journals in their respective fields. 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide. Their choices reflect the history of each discipline or profession, taking into account rivalries between universities, professional societies, for-profit and not-for-profit publishers, and even nation-states and international ideologies, in each journal's quest for reputational dominance. Each journal was judged using criteria such as longevity of publication, foresight in carving out its niche, ability to attract & sustain professional or academic affiliations, opinion leadership or agenda-setting power, and ongoing criticality to the study or practice of their field. The book presents wholly independent reviewers; none are in the employ of any publisher, but each is fully credentialed and well published, and many are award-winners. The authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty, students, and working professional clientele.

Society and Technology Sep 30 2019 This book offers broad evidence on how new information and communication technologies (ICT) impact social development and contribute to social welfare. Its aim is to show how new technological solutions may contribute to society's welfare by encouraging new 'socially responsible' initiatives and practices as the broad adoption of new technologies becomes an integral component of organizations, and of the overall economy. *Society and Technology: Opportunities and Challenges* is designed to provide deep insight into theoretical and empirical evidence on ICT as socially responsible technologies. More specifically, it puts special focus on examining the following: how channels of ICT impact on social progress, environmental sustainability and instability the role of ICT in creating social networks, with positive and negative consequences of networking how ICT encourages education, skills development, institutional development, etc. the ethical aspects of technological progress, and technology management for social corporate responsibility. The book is written primarily for scholars and academic professionals from a wide variety of disciplines that are addressing issues of economic development and growth, social development, and the role of technology progress in broadly defined socioeconomic progress. It is also an invaluable source of knowledge for graduate and postgraduate students, particularly within economic and social development, information and technology, worldwide studies, social policy or comparative economics.

Prometheus Assessed? Feb 13 2021 This book examines the problems, pitfalls and opportunities of different models of assessing research quality, drawing on studies from around the world. Aimed at academics, education officials and public servants, key features include an overview of the argument of whether research should be assessed and how research quality should be determined. *Prometheus Assessed?* offers a survey of research assessment models in the US, UK, Japan and New Zealand and includes an examination of citation analysis and comparison between the different models. Should research be assessed and what is research quality? Survey of research assessment models in US, UK, Japan and New Zealand Examination of citation analysis

Vital Statistics on Congress, 1991-1992 Apr 17 2021

Evaluation of the Arkansas Tobacco Settlement Program Jan 03 2020 The Tobacco Settlement Proceeds Act, a referendum passed by Arkansans in the November 2000 election, invests Arkansas' share of the tobacco Master Settlement Agreement funds in seven health-related programs. RAND was contracted to evaluate the progress of the seven programs in fulfilling their missions, as well as the effects of the programs on smoking and other health-related outcomes. This report charts the progress of each program, including assessing progress in achieving long-range goals established by the programs in 2005, tracking the programs' process measures, and assessing performance on a set of program management integrity criteria. The report also updates trends in outcome measures developed to monitor effects of the funded programs on smoking and other health-related outcomes. Finally, it provides program-specific and across-program recommendations for future activities and funding.

International Encyclopedia of Human Geography Sep 22 2021 The International Encyclopedia of Human Geography provides an authoritative and comprehensive source of information on the discipline of human geography and its constituent, and related, subject areas. The encyclopedia includes over 1,000 detailed entries on philosophy and theory, key concepts, methods and practices, biographies of notable geographers, and geographical thought and praxis in different parts of the world. This groundbreaking project covers every field of human geography and the discipline's relationships to other disciplines, and is global in scope, involving an international set of contributors. Given its broad, inclusive scope and unique online accessibility, it is anticipated that the International Encyclopedia of Human Geography will become the major reference work for the discipline over the coming decades. The Encyclopedia will be available in both limited edition print and online via ScienceDirect – featuring extensive browsing, searching, and internal cross-referencing between articles in the work, plus dynamic linking to journal articles and abstract databases, making navigation flexible and easy. For more information, pricing options and availability visit http://info.sciencedirect.com/content/books/ref_works/coming/ Available online on ScienceDirect and in limited edition print format Broad, interdisciplinary coverage across human geography: Philosophy, Methods, People, Social/Cultural, Political, Economic, Development, Health, Cartography, Urban, Historical, Regional Comprehensive and unique - the first of its kind in human geography

Advances in Distributed Computing and Machine Learning May 19 2021 This book presents recent advances in the field of distributed computing and machine learning, along with cutting-edge research in the field of Internet of Things (IoT) and blockchain in distributed environments. It features selected high-quality research papers from the First International Conference on Advances in Distributed Computing and Machine Learning (ICADCML 2020), organized by the School of Information Technology and Engineering, VIT, Vellore, India, and held on 30–31 January 2020.

Multidimensional Journal Evaluation Aug 02 2022 Scientific communication depends primarily on publishing in journals. The most important indicator to determine the influence of a journal is the Impact Factor. Since this factor only measures the average number of citations per article in a certain time window, it can be argued that it does not reflect the actual value of a periodical. This book defines five dimensions, which build a framework for a multidimensional method of journal evaluation. The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011.

Toward Quality Assurance and Excellence in Higher Education Oct 12 2020 Quality Assurance is not a new concept in the education sector in general, and higher education in particular, though it is becoming increasingly more relevant and important. Higher education helps to improve an individual's quality of life by enabling them to inflate their knowledge and expertise, to grasp abstract concepts and theories, and to raise their awareness of the world and their community, and as such the assurance of quality is becoming more pivotal in the whole education process. There is no simple definition of the concept of quality in education, though numerous models and theories have been devised. *Toward Quality Assurance and Excellence of Higher Education* is a new episode of the Quality Assurance perception in higher education, which identifies the quality culture and orientation from the beginning, integrating crucial factors to build a “pyramid” of higher education excellence. The book compares concepts from the main theories of Quality Assurance, management and control when they are applied to educational systems in higher education. The book also presents a new model of excellence in higher education. Excellence is an architecture of building blocks that comes with process performance, effectiveness, harmony and collaboration which should be incorporated in a quality-oriented concept of a sustainable excellence of higher education. The model integrates four main facets: the Educational System, Quality Assurance Managing and Control, Strategic Planning and Globalization. Also presented are international “best-practices” in quality assurance in higher education, from Japan and Finland.

Computer Security Handbook Jul 29 2019 This is the most comprehensive book on computer security on the market, with 23 chapters and 29 Appendices covering virtually all aspects of computer security. Chapters are contributed by recognized experts in the industry. This title has come to be known as "Big Blue" in industry circles and has a reputation for being the reference for computer security issues.

Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis Nov 05 2022 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis. Regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals. A sample of 57 publishers with 6,272 scientific journals and 50 standalone scientific journals was analyzed during research procedure. In this study, two different indicators about websites

classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals, Alexa rank and Statscrops rank. The electronic databases through the internet constitute the main information resources of this study about the impact factors. The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web. Furthermore, it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non-linearly correlation. Even if there is very strong correlation between impact factor and web rank for electronic journals, the prediction of impact factor from web rank is not possible and presents many divergences.

Evaluation of the Arkansas Tobacco Settlement Program Dec 26 2021 Arkansas' Tobacco Settlement Proceeds Act invests the state's share of the tobacco Master Settlement Agreement funds in seven health-related programs. This report assesses the progress of each of the funded programs in achieving its long-range goals, tracks the programs' process indicators, and updates trends in outcome measures developed to monitor effects of the funded programs on smoking and other health-related outcomes.

World University Rankings and the Future of Higher Education Sep 03 2022 Delivering quality education to students while remaining competitive at an international level is only one of the many challenges universities face today. To attain their goals, universities must adopt new strategies to achieve academic excellence. World University Rankings and the Future of Higher Education is a pivotal reference source for the latest scholarly research on the implementation of a ranking system for higher education institutions, providing a thorough overview of the impacts of these rankings on educational quality. Exploring the benefits and challenges of this system in a global context, this book is ideally designed for academicians, researchers, students, administrators, and policy makers interested in the effects of university rankings in the education sector and beyond.

Measuring Up in Higher Education Oct 24 2021 This book examines the quality assessment movement in academic scholarship, as globalization prompts a search for global measures of university services and output. It gauges productivity in terms of universal publication metrics, and considers ranking and research productivity from a comparative perspective. The book considers the use of the "impact factor" as a gauge of publication value, noting that this is less important in countries lacking central government appropriations to universities and to research. It argues that pressure to publish in certain journals, and to research topics of interest to English language readers, has been felt differentially in English-language systems, compared to others, but also that performance pressures fall more on younger, more junior, contract staff, than on senior and tenured professors. It problematizes international comparisons of quality, and analyses the benefits of a zone of ideas and metrics in a common language – promoting international mobility, efficiency, collaboration - but also the costs which are rarely borne equally across countries, languages and cultures. The book provides a strong, evidence-based contribution to major debates in contemporary higher education reforms and the measurement of academic output.

The Future of the Academic Journal Jun 19 2021 Examines current issues in journals publishing and reviews how the industry will develop over the next few years. With contributions from leading academics and industry professionals, the book provides an authoritative and balanced view of this fast-changing area. There are a variety of views surrounding the future of journals and these are covered using a range of contributors. Online access is now taken for granted - 90 per cent of journals published are now available online, an increase from 75 per cent in 2003. Looks at a fast moving and vital area for academics and publishers Contains contributions from leading international figures from universities and publishers

The Impact of Higher Education Ranking Systems on Universities Oct 04 2022 This book, written by three generations of rankings academics with considerable experience from three very different regions of the globe, lifts the lid on the real impact of higher education ranking systems (HERS) on universities and their stakeholders. It critically analyses the criteria that make up the 'Big Three' global ranking systems and, using interviews with senior administrators, academics and managers, discusses their impact on universities from four very different continents. Higher education continues to be dominated by a reputational hierarchy of institutions that sustains and is reinforced by HERS. Despite all the opinions and arguments about the legitimacy of the rankings as a construct, it seems experts agree that they are here to stay. The question, therefore, seems to be less about whether or not universities should be compared and ranked, but the manner in which this is undertaken. Delivering a fresh perspective on global rankings, this book summarizes the development of HERS and provides a critical evaluation of the effects of HERS on four different major regions – South Africa, the Arab region, South East Asia, and Australia. It will appeal to any academic, student, university administrator or governing body interested in or affected by global higher education ranking systems.

Scholarly Communication in Library and Information Services Sep 10 2020 This book has been written with a view to understand the validity of the perceptions of Open Access (OA) e-journals in the Library and Information Science (LIS) field. Using relevant OA journals this book presents and evaluates journals qualitatively and quantitatively. Over the last three hundred years scholarly journals have been the prime mode of transport in communicating the scholarly research process. However in the last few decades, a changing scenario has been witnessed in their form and format. OA is an innovative idea that attracts a fair amount of support and opposition around the world because it bridges the gap between digitally divided scholars by solving the pricing and permission crises that have imbalanced the scholarly communication process. Some scholars are of the opinion that OA has led to a chaotic environment where anyone can publish anything. Scholarly Communication in Library and Information Services records, in detail, the impact by accessing the journals' web site qualitatively and quantitatively in measuring the important elements such as articles, authors, countries, subjects and cited references. Finally, the book calculates the impact factor using synchronous and asynchronous approaches. First ever study to extensively evaluate LIS Journals' Web site qualitatively by using a newly developed set of criteria LIS OA journals are also evaluated quantitatively Counts citations of LIS OA articles in terms of formal citations by using Google Scholar
