[Human Trafficking](#) Jan 03 2020 Human trafficking captured the attention of the global community well over a decade ago, inspiring multifarious international, national, regional and local responses. While formally recognized as one of the major threats associated with transnational organized crime, human trafficking remains an issue about which much has been written and yet little is known or supported by empirical evidence. The essays selected for this volume reflect four key areas of debate: the transnational organized crime framework; the data and research landscape; the implementation of anti-trafficking responses; and the articulation of alternative responses to human trafficking. These essays are written by well-known and more recent contributors to this field of research. The collection draws attention to contemporary arguments as well as recent empirical research, and points to the importance of contextualizing human trafficking within both the global and local setting. This volume reflects where human trafficking data, research and debate is currently located and where it is heading, and as such is of interest to academics, students, policymakers and practitioners.

[The Management Shift](#) Aug 02 2022 Research shows that corporate life expectancy and performance have declined 75% in the last 50 years - organizations need a different approach if they are to survive, let alone thrive. While people are often stated as a company's greatest asset, few businesses have a clear model of leadership that improves engagement, removes barriers to innovation, and uncovers hidden strengths in people and the organization. This book addresses that need and, more importantly, demonstrates HOW organizations can make The Management Shift to a new way of thinking and working. Professor Hlupic argues that organizations now need to adopt a leadership style that focuses on people, purpose and knowledge sharing, creating new types of value and ultimately improving innovation and engagement - leading to improved business. Based on leading-edge research supported by numerous case studies, which demonstrate the power and impact of change, The Management Shift offers managers a practical and systemic approach to diagnose leadership issues in their organization. It then provides an implementation process to shift their mindset and organizational culture to the new level of thinking, performance, and ultimately business success.
